

Parents Guide to Supporting Times Table Rock Stars

- All children are set a 'gig' which is a baseline of 100 questions, starting with 10 questions on the 10s, followed by 10 questions on the 2s, 5s, 3s, 4s, 8s, 6s, 7s and 9s then 5 questions on the 11s and 12s. There is a 5 minute time limit and pupils will not necessarily get round to answering all 100 questions in that time, which is fine.
- After their first 'gig', pupils will be automatically placed at the best starting point for them. They will be issued other 'gigs' to update their information throughout their time practicing on TTRS.
- You can access your child's times table grid by looking at the 'My Stats' section on their account - which can be accessed on computers, laptops, tablets, phones etc.

- The Government set times table test - which will be first issued in June 2020 for all Year 4 children - requires children to answer their times table question in under 6 seconds. We have also recognised the benefit of having these instant facts for working through written calculations with pace and accuracy in Maths.

Independent games

Garage - Once a child has had a 'gig' the times tables set on garage will be tailored to their appropriate level. They will be offered another gig when they are ready to move on.

Studio - develops pace and instant recall, this also supports the children in their 'studio status' and gives clear indication of an average pace.

Soundcheck - this mirrors the Year 4 statutory Multiplication Tables Check and gives children 25 questions to answer. They have 6 seconds to answer each question before moving on.

Jamming - the children can self-select their focus times table e.g. if they need to learn their 3x they can focus just on that times table here.
